

# Comparison of commands and tools by product for Vectorworks 2026

This document lists all of the commands and tools available in this version of Vectorworks software, and the products in which they are available. This allows you to easily compare features side by side for each product.

The first section covers commands on both regular menus and context menus. The second section covers tools in every tool palette and tool set.

## Vectorworks 2026 product comparison: Commands

(F: Fundamentals, D: Design Suite, A: Architect, L: Landmark, S: Spotlight, C: ConnectCAD)

| Command                              | Path                                            | F | D | A | L | S | C |
|--------------------------------------|-------------------------------------------------|---|---|---|---|---|---|
| 1-1/2 Space                          | Text > Spacing                                  | X | X | X | X | X | X |
| 2D Plan                              | View > Projection                               | X | X | X | X | X | X |
| 2D Polys to 3D Source Data...        | AEC > Survey Input                              |   | X | X |   |   |   |
| 2D Polys to 3D Source Data...        | Landmark > Survey Input                         |   |   |   | X |   |   |
| 3D Polygons to 3D Loci...            | AEC > Survey Input                              |   | X | X |   |   |   |
| 3D Polygons to 3D Loci...            | Landmark > Survey Input                         |   |   |   | X |   |   |
